# Dashboard Design

Design by Toktam Kowsari

Introduction

About the project

This dashboard is a kind of simple and minimal management systems for different companies of any size. It is designed to automate the management of users, tasks, finance, operations and projects by inspiring from Metronic. This system has capacibility to customize as well as companies' need.

> This kind of dashboards can be a good solution for bussiness. It is about saving a huge amount of money, time and resources to manage a team and its work flow.

Style Guideline

Color palette

I think dashboard is a kind of panel that many users spend alot of time there so I chosen calm and natural colors which are simple to preceive all genders and nationalities.

Outcome

Achieved Results

After wireframing and testing, I've added colors and icons to make the visual part of the dashboaard. Here are some screens and cards that are designed for this project.
